- ___ Roll marking, • ___ Other (describe): _____

Production requirements: (hourly) _____ (quantity) _____

How much force can be applied to the surface you want to mark: _____

Please provide a drawing or sketch of your application. Fax drawing separately or use the space to the right for a sketch. Please include dimensions.

The attached marking product specification sheet is provided to give you a general idea of how this class of marking device functions for its intended application.

Virtually all marking is unique to the specific application. This is true whether Wagner or some other engraver is producing the stamps, dies, type, inserts, etc.

Off-The-Rack may work fine in the clothing business, but solving your marking needs involves assessing the unique size and shape of the article you want marked, and the information you want it marked with.

This questionnaire will help you define your marking needs and assist us in recommending the optimum marking product.
