

# Hot Foil Stamps — Burning Brands

**Metal or Silicone Rubber Hot Stamp Dies can be copied precisely from artwork, letterhead or photocopy to give an exact reproduction**

Hot stamping or burning brands use a heated die to transfer colored foil to a surface (or burn it) with the desired design or information.

#### **Hot Stamping Dies Can Imprint**

- Text
- Numbers
- Logos
- Decorations
- Symbols
- Calibration marks

#### **Hot Stamping Colors**

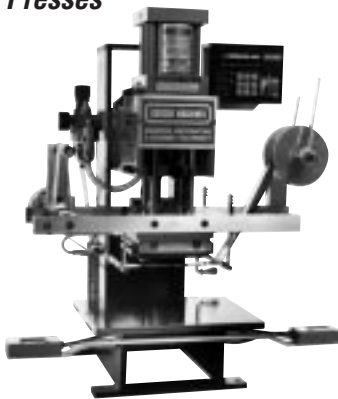

Hot stamping foils are available in a wide variety of colors and materials to match different substrates such as plastic, wood, leather and vinyl, etc.

#### **Die Materials**

Depending on the detail, operating temperature and duty cycle, hot stamping dies can be made from tool steel, brass, copper, magnesium and silicone rubber.

Dies made with cavities provide a means to change information such as batch, model or serial numbering. Die cavity inserts can be individual type, logos or spacers.

## **Hot Stamping Presses**

Wagner Engraving offers a full line of hot stamping presses in ranges from 1/4 to 20 tons.

#### **Standard Features**
